A warehouse is a unique environment which combines machinery, people and large amounts of product. This mixture can, at times, create a hazardous work environment. Because of this, warehouses must consider unique safety procedures and guidelines.

Installing a PED-SAFE Barrier System is one way of ensuring safety for your staff and visitors.

- ⊗ Safe
- ⊗ Smart Looking
- ⊗ Modular
- ⊗ Easy to install

MODULAR

Made from posts and rails, the PED-SAFE System features clean and smart joins and is easy to customise to any length or configuration.

AUTO-CLOSE SELF-LATCHING GATE

Simple spring loaded gates that automatically close and latch behind you. Key locks provide an additional method of locking out certain areas.

SAFETY

The PED-SAFE Barrier is ideal for keeping pedestrians and moving vehicles apart. Dedicated forklift passage ways are easily created and are a good way of ensuring pedestrians are kept out of harm's way.

The intent behind pedestrian walkways is safety, to keep people walking apart from those in forklift trucks and other vehicles and to reduce the incidence and possibility of accidents in the workplace.

SINGLE OR LONG RUNS

Whether you need to do short or long runs, the PED-SAFE Barrier system is the solution. Modular components make custom and tailored solutions easy.

MACHINERY ISOLATION

Isolating people from machinery is one of the obvious safety concerns in any factory environment.

The PED-SAFE Barrier System is an economical way to ensure pedestrian are kept out of harm's way.

REPLACEABLE PARTS

All components of the PED-SAFE Barrier System are fully replaceable should any damage occur.

	POST HEIGHTS	RAIL LENGTH	FINISH
PEDSAFE	1000MM	2400MM	POWDER COATED OVER ZINC
	CUSTOM SIZE (Up to 2400m)		

FORKSAFE

CERTIFIED IMPACT PROTECTION BARRIER SYSTEM
